_	Sketch a map showing streets, highways, routes or other prominent landmarks near the site. Place an X on the map to indicate the site location. Draw an arrow showing the direction north. You may substitute a		operation from 1969 to 1979.			

Describe the history and present conditions of the site. Give directions to the site and describe any nearby wells, springs, lakes, or housing, include such information as how waste was disposed and where the waste came from. Provide any other information or comments which may help describe the site conditions.

Intle landfarm was in operation from 1969 to 1979.

Only normal petroleum refinery wastes (i.e. DAF skimmings, exchanger bundle sludge, API separator bottoms, non-leaded tank bottoms, various other oily, sludges, etc.) were disposed of on the area.

The site is located on the extreme northeast section of the refinery property about 300 yards south of Illinois State Route #33. It is separated from the highway by railroad tracks and is totally enclosed by an 8-foot cyclone fence. The area is also patrolled by roving guards 24 hours/day, 7 days/week. The area has been disked and seeded and a vegetation coverage is gradually developing.

J Signature and Title:

The person or authorized representative (such as plant managers, superintendents, trustees or attorneys) of persons required to notify must sign the form and provide a mailing address (if different than address in item A). For other persons providing notification, the signature is optional. Check the boxes which best describe the relationship to the site of the person required to notify. If you are not required to notify check. "Other."
